How to print

At home
- Use heavy matte paper or photo paper, and choose the highest quality setting on your printer.
- Select "actual size" or "fit to page" and check the preview before printing.

At a local print shop
- Bring the file on a USB drive or upload it on the shop's website.
- Ask for the size you need and a matte or lustre finish.

With an online print service
- Upload the file that matches your size, and check the crop preview before you order.

About colors

Printed colors may vary slightly from what you see on screen, because every screen, printer, and paper is different.
We recommend a small test print before printing large.
